

TOYOTA

VENZA 2009 -

IMPACT SENSOR

Part Number: 00016-47031

Accessory Code: QG1

## Conflicts

|                                    |
|------------------------------------|
| Vehicles without factory security. |
|------------------------------------|

### Kit Contents

| Item # | Quantity Reqd. | Description               |
|--------|----------------|---------------------------|
| 1      | 1              | Security Interface Module |
| 2      | 1              | Shock Sensor              |
| 3      | 1              | Main Harness              |
| 4      | 1              | Hardware Bag              |
| 5      | 2              | Anti-Theft Window Decals  |
| 6      | 1              | Owner's Card              |
| 7      |                |                           |
| 8      |                |                           |

### Hardware Bag Contents

| Item # | Quantity Reqd. | Description             |
|--------|----------------|-------------------------|
| 1      | 3              | Red T-Tap Terminal      |
| 2      | 12             | 8" Black Cable Ties     |
| 3      | 1              | Foam Mounting Pad       |
| 4      | 1              | Red Scotchlok Connector |
| 5      |                |                         |
| 6      |                |                         |
| 7      |                |                         |
| 8      |                |                         |

### Recommended Tools

| Safety Tools           |                 |
|------------------------|-----------------|
| Safety Glasses         |                 |
| Vehicle Protection     |                 |
| Special Tools          |                 |
|                        |                 |
|                        |                 |
| Installation Tools     |                 |
| Philips Screwdriver    | Drill Motor     |
| Ratchet with Extension | 10mm Socket     |
| Diagonal Wire Cutters  | Common Pliers   |
| Flashlight             | Nylon Trim Tool |
| Torque Wrench 36 in-lb |                 |
|                        |                 |
| Special Chemicals      |                 |
|                        |                 |
|                        |                 |

### Vehicle Service Parts (may be required for reassembly)

| P/N            | Qty. | Description                |
|----------------|------|----------------------------|
| 00016-47031-03 | 1    | Interface Control Module   |
| 00016-30960-02 | 1    | Shock Sensor Module        |
| 00016-47031-02 | 1    | Miscellaneous Hardware Kit |
| 00016-30960-03 | 2    | Window Warning Decal       |
| 00016-47031-01 | 1    | Wire Harness               |
|                |      |                            |

### General Applicability

|                                |
|--------------------------------|
| Vehicles with factory security |
|--------------------------------|

### Recommended Sequence of Application

| Item # | Accessory |  |
|--------|-----------|--|
| 1      |           |  |
| 2      |           |  |
| 3      |           |  |

\* Mandatory

### Legend

 **STOP:** Damage to the vehicle may occur. Do not proceed until process has been complied with.

 **OPERATOR SAFETY:** Use caution to avoid risk of injury.

 **CAUTION:** A process that must be carefully observed in order to reduce the risk of damage to the accessory/vehicle and to ensure a quality installation.

 **TOOLS & EQUIPMENT:** Used in Figures calls out the specific tools and equipment recommended for this process.

 **REVISION MARK:** This mark highlights a change in installation with respect to previous issue.

 **SAFETY TORQUE:** This mark indicates that torque is related to safety.

**SPECIAL NOTE: Installation Sequences**

After TMS and Safety mandated preparatory steps have been taken, the installation sequence is the suggested method for completing the accessory installation. In some instances the suggested sequence is written for one associate to install and in others the sequence is given as part of a team accessory installation. Unless otherwise stated in the document, the associates may perform the installation steps in any order to make the installation as efficient as possible while maintaining consistent quality.

## PREPARATION

### INSTALLATION PREPARATION

Before starting installation:

1. Familiarize yourself with the installation instructions.
2. Inspect kit components.

### VEHICLE PREPARATION

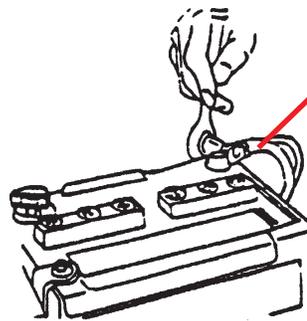

**Verify that the vehicle shorting pin is installed prior to installation.**

1. Place protective coverings on vehicle.
2. Disconnect negative battery clamp.
3. Remove the passenger's side scuff plate by inserting a plastic panel tool under the scuff plate and prying upward to disengage the snap clips.

**Optional Step: Insert a plastic tool under the front of the scuff plate and passenger's side kick panel. Lift only that area.**

4. Remove the nut that secures the passenger's side kick panel.
5. Remove the passenger's side kick panel by inserting a plastic panel tool under the kick panel and carefully prying to disengage the snap clips.
6. Remove the 10mm bolt from the right side and the Philips screw from left side of the passenger's side finish panel. Pull the finish panel outward from the vehicle dash to disengage the snap clips.

**NEGATIVE BATTERY CABLE**

# INSTALLATION PROCEDURES

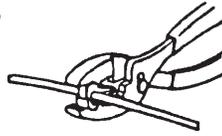

## T-TAP INSTALLATION

When installing female T-Tap connectors, be sure the wire is located inside the wire channel of the female T-Tap connector before closing the connector over the wire with pliers.

Step A

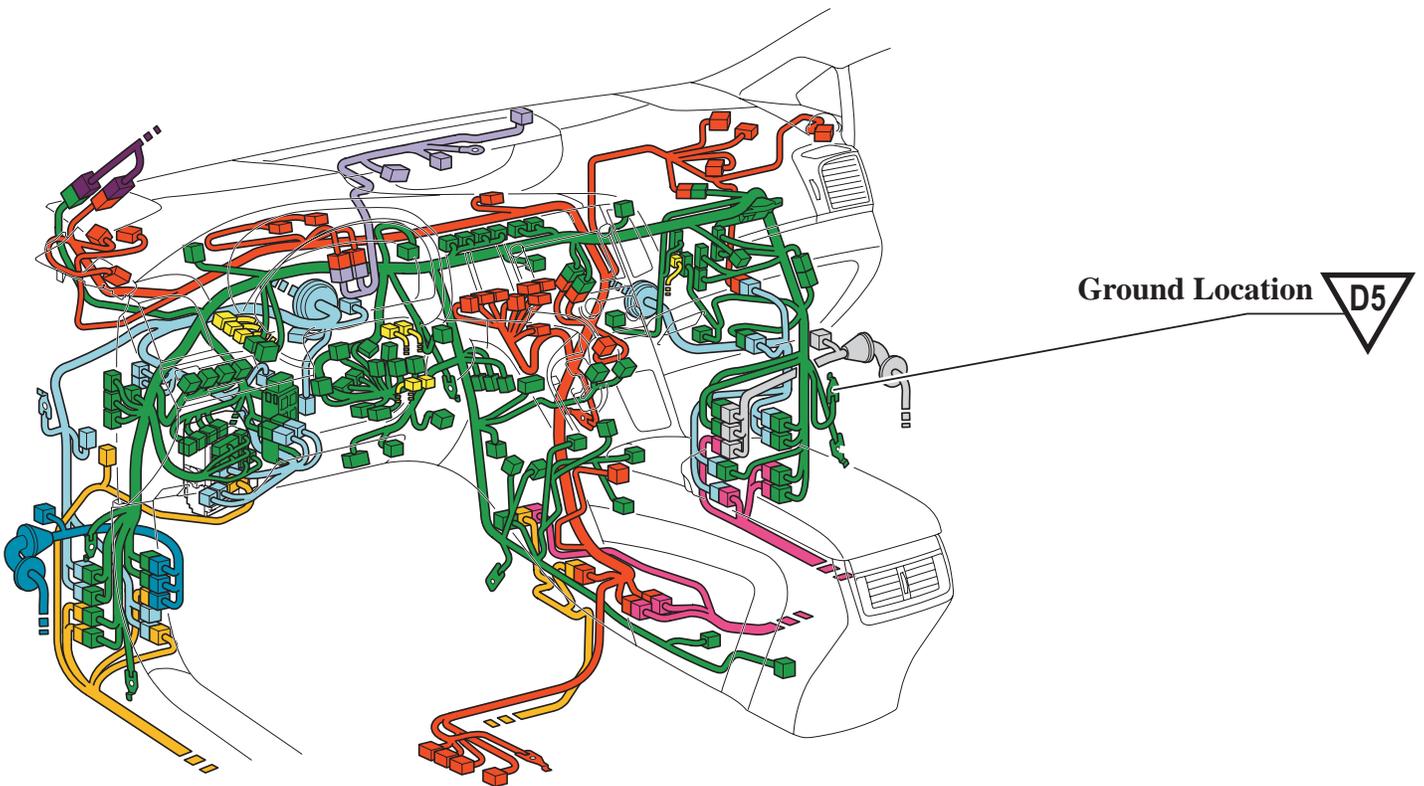

Step B

Step C

**IMPORTANT!** After installation, inspect and ensure that Keyless System Harnesses are clear of all **HOT, SHARP** or **MOVING** objects.

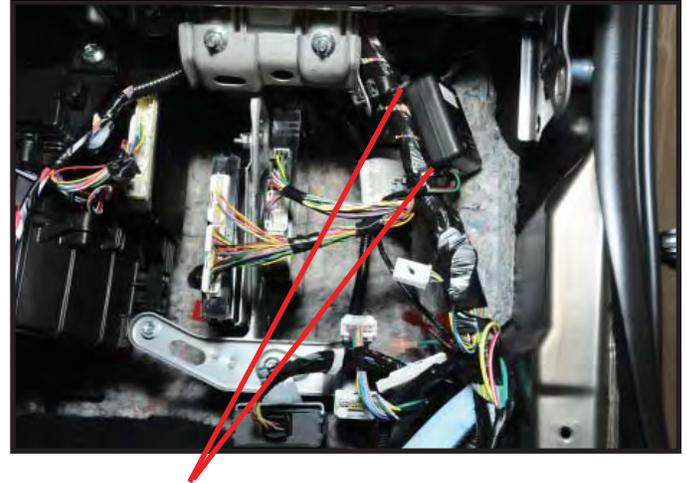

## INSTALLATION PROCEDURES

### INSTALLING THE SHOCK SENSOR

1. Secure shock sensor to wire loom running near the firewall on the passenger's side with (2) wire ties.
2. Plug in 4 cavity Molex connector from the main harness into the rear of the shock sensor.

**Guide the cable tie through the module eyelets, as shown.**

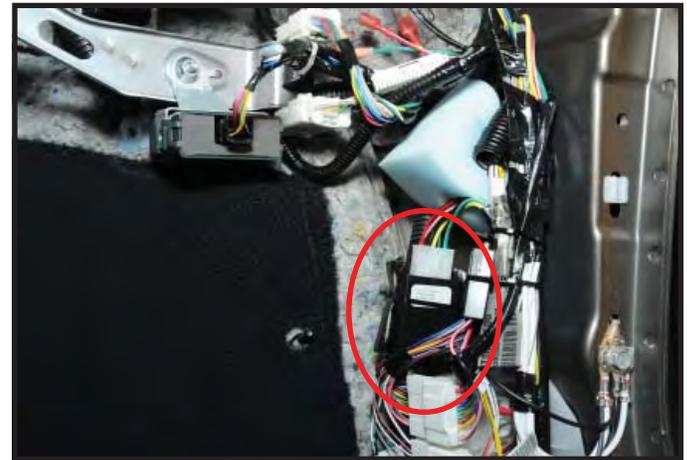

**CABLE TIES**

### INSTALLING THE ALARM INTERFACE RELAY

1. Plug in 10 way Molex connector from the main harness into the Alarm Interface Relay.
2. Secure Alarm Interface Relay to factory harness in the passenger's side kick panel using (1) wire tie.

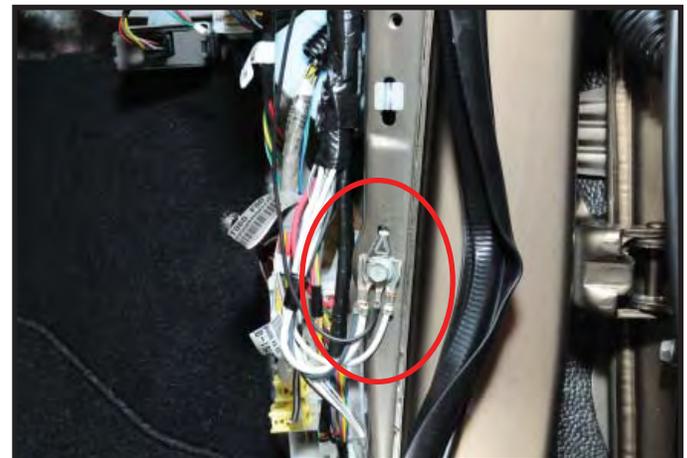

**Carefully follow the wiring diagram and factory details on pages 4-5.**

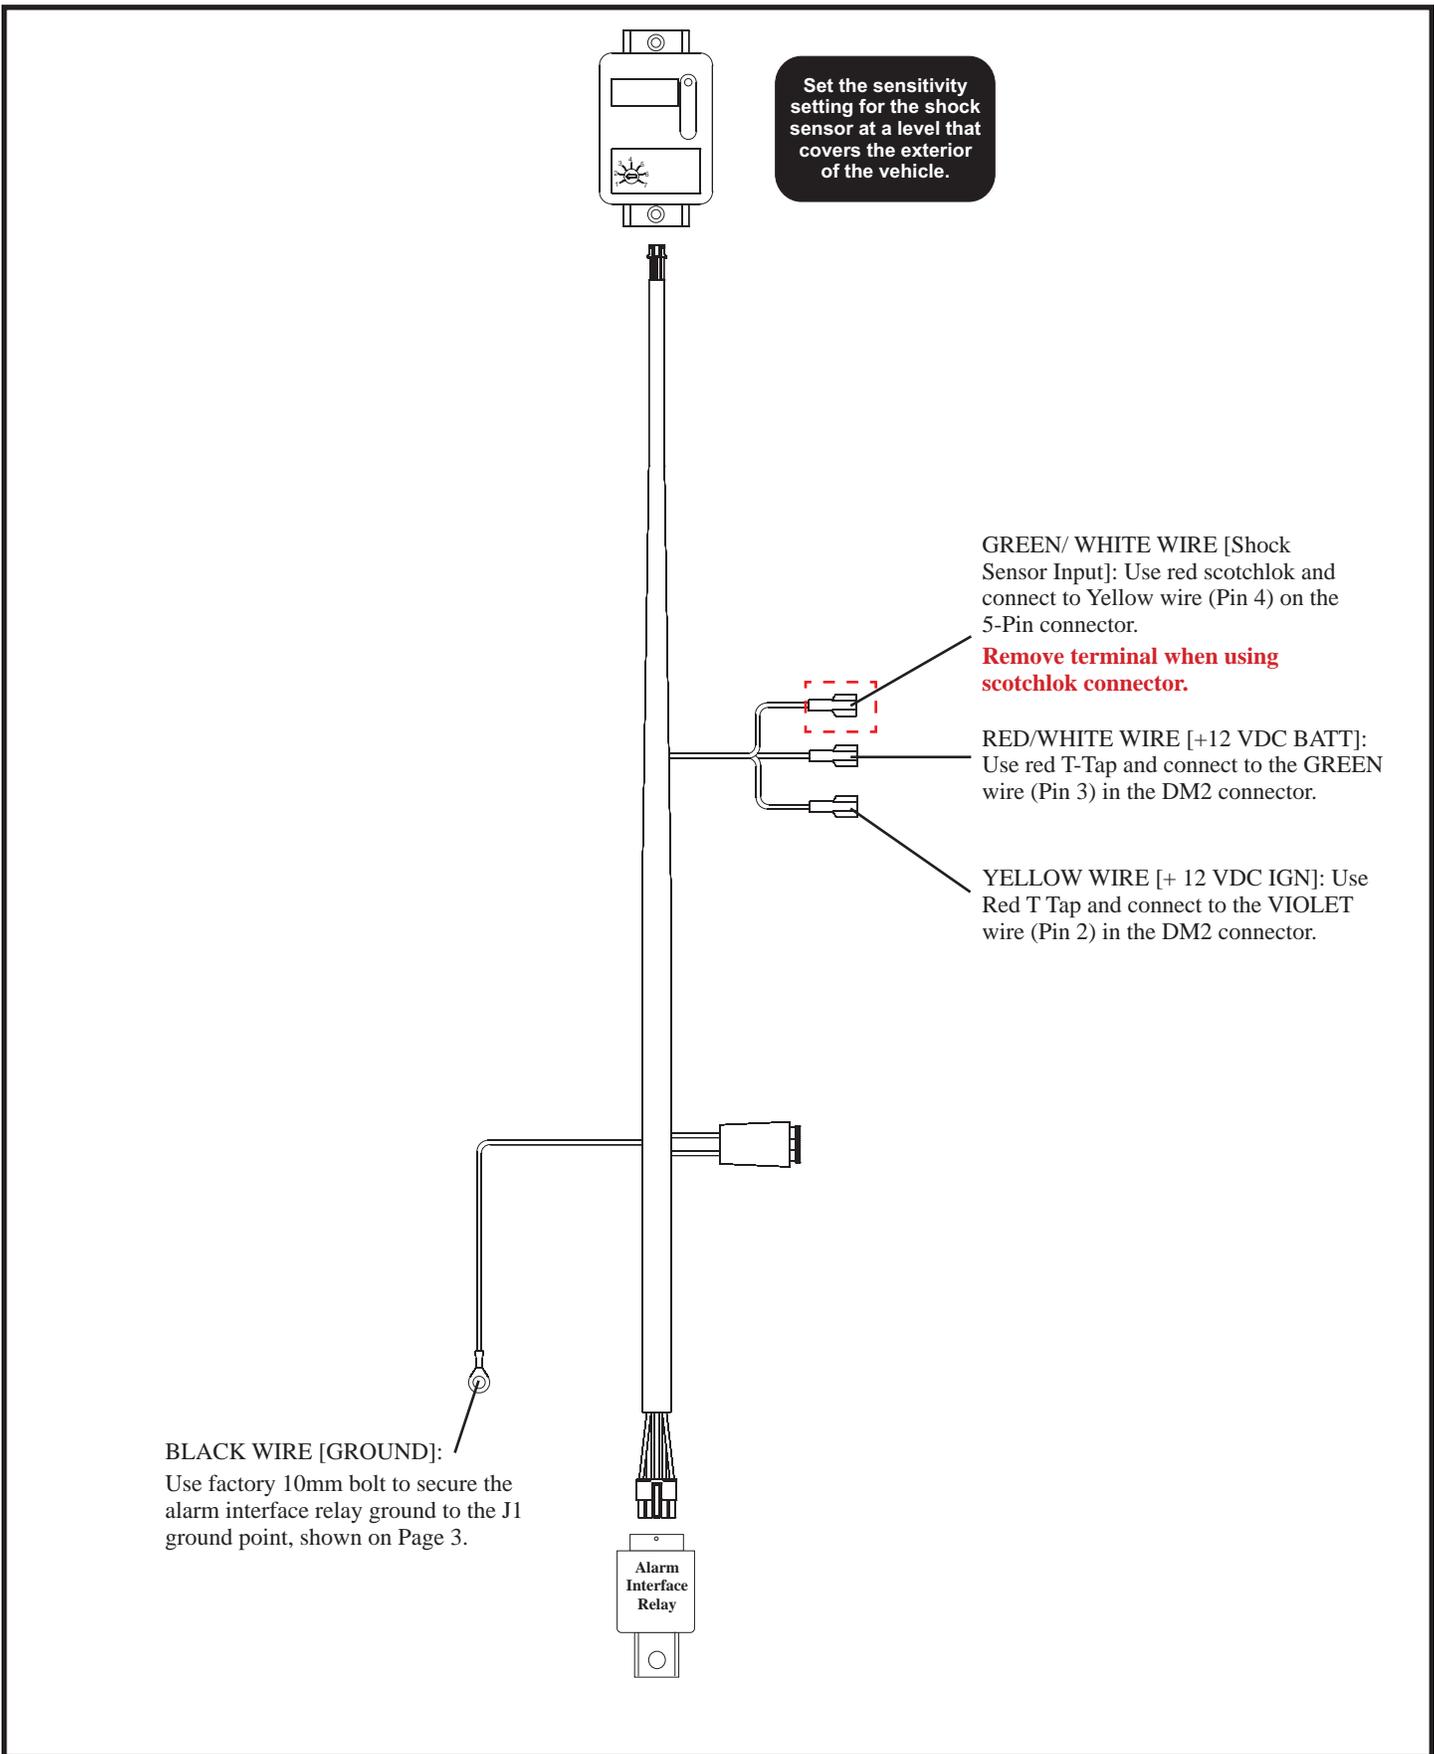

### SECURING THE ALARM INTERFACE GROUND CONNECTION

Use the factory 10mm bolt to secure the alarm interface relay ground to the J1 ground point, shown on Page 3.

# WIRING DIAGRAM

# CONNECTOR DETAILS

## 5-PIN CONNECTOR

Location: Passenger's Kick Panel (Taped to Main Harness)

White Connector

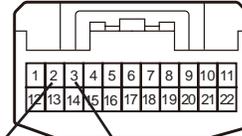

Pin 4  
Yellow Wire  
Shock Sensor Input

|              |            |
|--------------|------------|
| <b>ALARM</b> | <b>CAR</b> |
| Green/White  | Yellow     |

## CONNECTOR DM2

Location: Passenger's Kick Panel

White Connector

Pin 2  
Violet Wire  
+12 VDC IGN

Pin 3  
Green Wire  
+12 VDC BATT

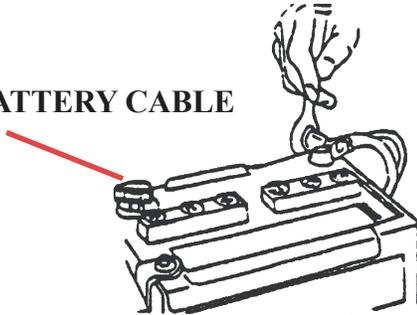

|              |            |
|--------------|------------|
| <b>ALARM</b> | <b>CAR</b> |
| Red/White    | Green      |
| Yellow       | Violet     |

## COMPLETING THE INSTALLATION

**NOTE:** Re-torque the battery cable to 36 in-lb once the process is completed.

NEGATIVE BATTERY CABLE

**NOTE:** Factory remotes should minimum of 10ft away from ignition during testing.

### VEHICLE FUNCTION CHECK

AFTER ALL PANELS, COVERS, AND COMPONENTS HAVE BEEN REINSTALLED, THAT WERE REMOVED, TEST THOROUGHLY, ALL MECHANICAL AND ELECTRICAL COMPONENTS DISCONNECTED AND OR REMOVED FROM THE VEHICLE DURING THE INSTALLATION OF THIS ACCESSORY.

Verify that the vehicle shorting pin is installed prior to testing.

### TESTING THE SYSTEM

1. Prior to delivering the vehicle, test all features of the factory system according to the vehicle's owner's manual.
2. Be sure to arm the system by pressing the LOCK button on the keyless entry transmitter. The factory security light will turn on solid for approximately 30 seconds, then begin to flash indicating the system is armed. At this time, deliver a firm strike to the driver's A Pillar with the open palm of the hand. The alarm should trigger as a result of the shock sensor.

### ASSEMBLING ALL REMOVED PANELS TO THE VEHICLE

1. Refer again to the vehicle repair manual and reassemble all panels removed during installation back onto the vehicle.
2. Apply the window warning decals to the driver side and passenger side front windows, just above the anti - theft radio stickers if equipped. If not equipped, apply the decals at the lower rear edge of the window. The decals are reverse printed, and are applied to the inside surface of the glass.
3. Place owner's card in glove box.

## VEHICLE FUNCTION CHECKLIST

### THESE POINTS MUST BE CHECKED TO ENSURE A QUALITY INSTALLATION

- |   |   |
|---|---|
| <input type="checkbox"/> Head Light<br><i>If the warning lights remains on, it may indicate a system malfunction.</i> | <input type="checkbox"/> Power Side Mirrors (if equipped)   |
| <input type="checkbox"/> High Beams   | <input type="checkbox"/> Side Mirror Defogger (if equipped)   |
| <input type="checkbox"/> Turn Signal Lights   | <input type="checkbox"/> Front Windshield Defogger (if equipped)  |
| <input type="checkbox"/> Tail Lights  | <input type="checkbox"/> Navigation System (if equipped)  |
| <input type="checkbox"/> Stop Lights  | <input type="checkbox"/> Rear Sunshade (if equipped)  |
