

**Part Number: 08253-52800**

**NOTE:** Part number of this accessory may not be the same as the part number shown.

**Kit Contents**

Item #	Quantity Reqd.	Description
1	1	Overhead Console
2	2	Cap
3	1	Plastic cover
4	1	Photo Mount Sheet
5	1	Template
6	1	Installation Instructions

**General Applicability**

**Recommended Tools**

<b>Installation Tools</b>	<b>Notes</b>
Electric Drill Bit	φ 2.5, φ 6.0
Drilled Portions	
Phillips Screwdriver	
Cutting knife	
Marker Pen	
Tape	
Nylon remover tool	
<b>Safety Tools</b>	<b>Notes</b>
Protective blanket	
Protective Glasses	
Protective Gloves	

**Legend**

	<b>STOP:</b> Damage to the vehicle may occur. Do not proceed until process has been complied with.
	<b>OPERATOR SAFETY:</b> Use caution to avoid risk of injury.
	<b>CAUTION:</b> A process that must be carefully observed in order to reduce the risk of damage to the accessory/vehicle and to ensure a quality installation.
	<b>TOOLS &amp; EQUIPMENT:</b> Used in Figures calls out the specific tools and equipment recommended for this process.

Care must be taken when installing this accessory to ensure damage does not occur to the vehicle. The installation of this accessory should follow approved guidelines to ensure a quality installation.

These guidelines can be found in the "Accessory Installation Practices" document.

This document covers such items as:-

- Vehicle Protection (use of covers and blankets, cleaning chemicals, etc.).
- Safety (eye protection, rechecking torque procedure, etc.).
- Vehicle Disassembly/Reassembly (panel removal, part storage, etc.).
- Electrical Component Disassembly/Reassembly (battery disconnection, connector removal, etc.).

Please see your Toyota dealer for a copy of this document.

**Installation Overview**

**1. REMOVE NEGATIVE BATTERY CABLE**

- +** Disconnect the cable from the negative battery terminal before performing this work. Working with the cable connected could result in injury, fire or damage to the vehicle and parts thereof. (Fig. 1-1)

**2. DRAW CUT LINE ON ROOF HEADLINER**

- !** **NOTE:**  
Securely insert the front end of the template between the roof headliner and front glass, to prevent it from falling off the roof headliner, as shown Fig.2-2.
- (a) Align the template with the contour line of the map light / dome light and secure it with tape in the positions indicated by the reference marks in Fig-2-1. Then trace the cutout holes on the template with a marker pen, as shown in Fig.2-1.

**3. REMOVE MAP LIGHT**

- (a) Remove the map light and disconnect the vehicle wire harness from the map light.

**■ HOW TO MAKE CUTOUTS FOR OVERHEAD CONSOLE INSTALLATION**

Perform the following steps 1 and 2 before making cutouts on the roof headliner.

(1) Make a slit around the corner of all the rectangular cutouts.

(2) Cut along the outer edge of the marked area.

Fig.4-1

When no slits are made.

Damage to the roof headliner and panel may result.

When a slit is made.

Damage to the roof headliner and panel can be prevented.

Wear protective gloves and glasses as necessary, to prevent chips from getting into eyes or causing hand injury.

Ensure that the length of the blade protruding from the cutting knife cover is not longer than 20 mm, to prevent the roof panel from being damaged.

Fig.4-2

**4. MAKE CUTOUT FOR OVERHEAD CONSOLE INSTALLATION**

**NOTE:**

To protect the vehicle interior from cutting debris, cover the interior with a protective blanket before cutting the roof headliner.

- (a) Cut along the marked lines to remove the L-shaped and rectangle hatched area from the roof headlining, as shown in the Fig.4-2. (Refer to “How to make cutout for overhead console installation Fig4-1.)

**NOTE:**

When marking cutouts on the Fr side of the roof head lining, please check vehicle wire harness through map lamp installation hole.

(b) Route the vehicle wire harness along the roof headlining as shown in the cross-sectional view. Ensure that it does not overlap the cutout line on the roof headlining. Cut along the marked lines to remove the square-shaped hatched area from the roof headlining, as shown in the Fig.4-3.

### 5. DRILL TWO HOLES

(a) Start holes with a 2.5mm drill bit. Finish drilling with a 6.0mm drill bit.

#### ⚠ NOTE:

Install a drill stopper onto the drill bit, an appropriate length away from the tip end, as shown in the illustration.

### 6. INSTALL OVERHEAD CONSOLE WITH BRACKET

(a) Insert turn nuts into reinforcement hole as shown in step1 of Fig.6-2. With a screw driver to rotate to position shown in step2 of Fig.6.2

(b) Insert the 2 grommets into the reinforcement holes(B)

#### ⚠ NOTE:

Slightly open the grommets using a phillips screwdriver, to prevent them from falling from the roof headlining.

(c) Bend the togrear board anchor to the correct shape. Insert the togrear board anchor into the drilled hole.

Fig.6-5

Fig.6-6

- (d) Open the lid of the overhead console and hang overhead console to hole in the chassis by using the center hook.
- (e) Run the connector into the hole on the overhead console, as shown in Fig.6-5.

Fig.6-7

- (f) Install overhead console by firmly tightening with the screws show in Fig.6-7

(g) Fit the 2 caps onto the screw heads.

(h) Close the lid, then connect the connector of the map light and insert map light in to the overhead console.

(i) Peel off the protective sheet from the plastic cover and set the plastic cover and photo mount sheet in place, as shown in the Fig.6-10.

**7. RECONNECT THE CABLE TO THE  
NEGATIVE BATTERY TERMINAL.**

(a) Reconnect the vehicle's negative battery cable.(Fig.7-1)

 Tighten the nut to 4.1 N-m.(36 lbf-in)

 Do not touch the positive terminal with any tool when replacing the cable etc.

Checklist - these points **MUST** be checked to ensure a quality installation.
