Reassembly	Page 4
Installation Tips	Page 4

Install Time: 1.5 Hours

Install Difficulty: Low/Medium

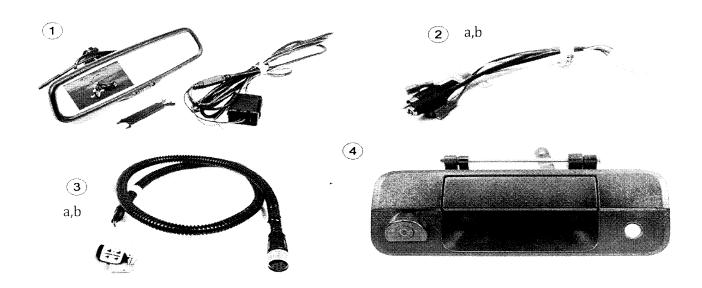

CAUTION: To minimize risk of injury from contact with the monitor during an accident, always wear your seat belt.

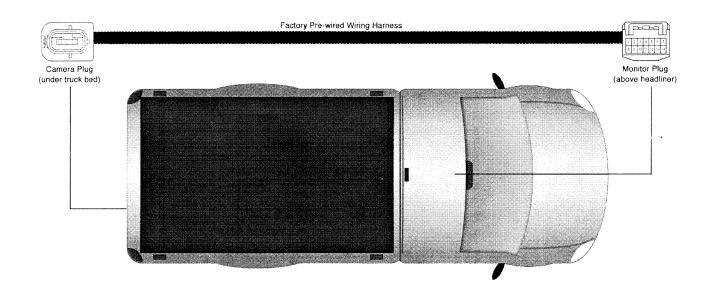

Parts Identification

Item	Qty.	Part	Description
		Number	
1	1	250-8208	4.3" LCD Rear View Mirror Monitor
2a	1	250-8026	Mirror Interface Harness (2007-2009)
2b	1	250-8623	Mirror Interface Harness (2010-2014)
3a	1	250-8027	Camera Interface Harness (2007-2009)
3b	1	250-8626	Camera Interface Harness (2010-2014)
4	1	250-8599	Tailgate-Handle/Camera Assembly

System Layout

Vehicle Preparation

Before beginning your installation familiarize yourself with the installation instructions and the RearSight® camera system components.

To ensure your safety (A) apply the emergency brake and (B) read this entire manual before beginning.

CAUTION: It is advisable to disconnect the negative battery cable for 3 minutes before beginning installation to avoid unintended air bag deployment. Note and record any anti- theft radio codes prior to disconnecting.

Installation

Tailgate-Handle Camera

- 1. Remove panel from the tailgate to gain access to the mounting components of the tailgate handle (figure 1).
- 2. Remove the factory tailgate latch and replace with integrated camera latch (figure 2 and figure 3).
- 3. Connect the camera interface harness to the tailgate-handle camera (figure 4).
- 4. Route camera interface harness out of tailgate to connect with truck's pre-wire harness (figure 5).

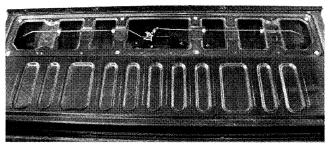

Figure 1

Figure 3

Figure 5

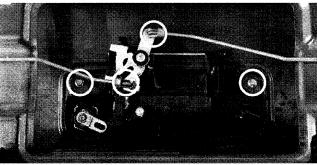

Figure 2

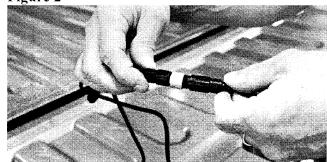

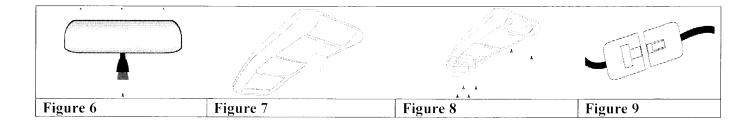

Figure 4

RearView Mirror

- 1. Loosen the T20 torx screw of the factory mirror and lift the mirror away from the windshield (figure 6).
- 2. Pry the front panel from the overhead console and lower the sunglasses holders (**figure 7**).
- 3. Remove the T20 torx screws securing the console to the headliner to expose overhead wiring (figure 8).
- 4. Connect the included mirror/interface harness assembly to the factory overhead wiring (figure 9).
- 5. Replace the overhead console and install the LCD mirror to the windshield tightening its torx screw.

Testing and Reassembly

Testing

- 1. Reconnect the negative battery cable and torque to 3 ft-lbs.
- 2. Re-enter any theft deterrent information (if applicable).
- 3. Turn the ignition switch to the ON position.
- 4. Shift the vehicle into reverse and confirm video feed to your device.

Note: If there is no picture present, re-check all harness connections.

Reassembly

- 1. Reinstall all trim pieces taking special care to ensure harnesses and wiring connections are properly secured.
- 2. Make sure no harnesses are bent or pinched by trim pieces.
- 3. Reconnect all disconnected bulbs and check for function.

Installation Tips

- Confirm proper harness connector orientation and always verify proper ends are routed in correct direction.
- It is a good idea to dry-fit all pieces in this kit before permanently attaching them to ensure proper orientation and operation before beginning installation for familiarization with components.
- Always treat any metal exposed during installation with a rust preventative compound to prevent system failure due to rust and/or corrosion.
- Always seal any holes drilled with the provided sealing putty to prevent water infiltration through unprotected areas.
- Confirm integrity of mechanical and electrical connections before moving to next installation sequence.
