Legend

STOP: Damage to the vehicle may occur. Do not proceed until process has been complied with.

OPERATOR SAFETY: Use caution to avoid risk of injury.

<u>CAUTION:</u> A process that must be carefully observed in order to reduce the risk of damage to the accessory/vehicle and to ensure a quality installation.

<u>TOOLS & EQUIPMENT:</u> Used in Figures calls out the specific tools and equipment recommended for this process.

REVISION MARK: This mark highlights a change in installation with respect to previous issue.

7 SAFETY TORQUE: This mark indicates that torque is related to safety.

REGULATORY MARK: This mark indicates the component is related to regulatory compliance

Procedure

Care must be taken when installing this accessory to ensure damage does not occur to the vehicle. The installation of this accessory should follow approved guidelines to ensure a quality installation.

These guidelines can be found in the "Accessory Installation Practices" document.

This document covers such items as:-

- Vehicle Protection (use of covers and blankets, cleaning chemicals, etc.).
- Safety (eye protection, rechecking torque procedure, etc.).
- Vehicle Disassembly/Reassembly (panel removal, part storage, etc.).
- Electrical Component Disassembly/Reassembly (battery disconnection, connector removal, etc.).

Please see your Toyota dealer for a copy of this document.

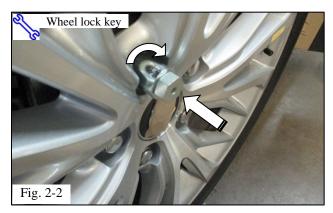

1. Remove One Lug Nut.

- (a) Remove one lug nut from each wheel (Fig. 1-1) and discard them according to local scrap/recycle regulations.
- brush prior to installing wheel locks. Use safety glasses while using a wire brush.

2. Install the Wheel Locks.

(a) Install a wheel lock on each wheel by hand (Fig. 2-1).

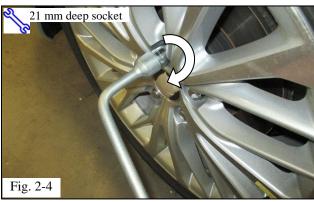

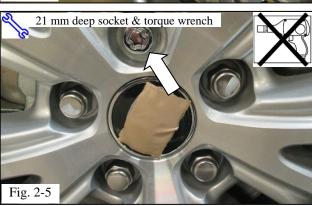

(b) Take the key supplied in the wheel lock set and place it on top of the wheel lock. Turn the key until the patterns engage (Fig. 2-2).

(c) Place the 21mm deep socket on top of the key (Fig. 2-3 & Fig. 2-4).

NOTE: It is not necessary to remove the key from the wheel lock, Fig. 2-3 is for illustrative purposes.

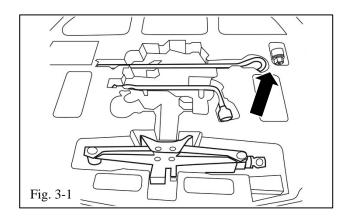

- (d) Apply pressure on the key and use a torque wrench to tighten the wheel locks to 103 N⋅m (76 ft·lbf) (Fig. 2-5).
- CAUTION: DO NOT USE IMPACT

 WRENCH TO INSTALL OR REMOVE
 WHEEL LOCKS.
- Torque: 103 N·m (76 ft·lbf)
 - (e) Perform torque audit (PPO only).

Torque: 103 N·m (76 ft·lbf)

3. Store the Key.

(a) Place the wheel lock key in the molded tool floor panel (Fig. 3-1).

4. Complete the Installation

(a) Place the wheel lock information in the zip lock bag and place it in the glove compartment.

TOYOTA CAMRY/HV, AVALON/HV 2018 -

WHEEL LOCK

Checklist - these points **MUST** be checked to ensure a quality installation.

Check:	Look For:
Accessory Function Checks	
Correct part number has been installed	Verify part number on package
Perform torque audit check (PPO only)	Torque: 103 N·m (76 ft·lbf)
	Complete the torque audit sheet (PPO only)
Key Placement	Verify key is placed in Tool Tray and
	wheel lock information packet in the glove compartment
Vehicle Appearance Check	
Vehicle Appearance Check After accessory installation and removal of protective cover(s), perform a visual inspection.	Ensure no damage (including scuffs and scratches) was caused during the installation process. (For PPO installations, refer to TMS Accessory Quality Shipping Standard.)
