Legend

STOP: Damage to the vehicle may occur. Do not proceed until process has been complied with.

OPERATOR SAFETY: Use caution to avoid risk of injury.

CAUTION: A process that must be carefully observed in order to reduce the risk of damage to the accessory/vehicle and to ensure a quality installation.

TOOLS & EQUIPMENT: Used in Figures calls out the specific tools and equipment recommended for this process.

REVISION MARK: This mark highlights a change in installation with respect to previous issue.

SAFETY TORQUE: This mark indicates that torque is related to safety.

FRONT SILL RH

REAR SILL RH

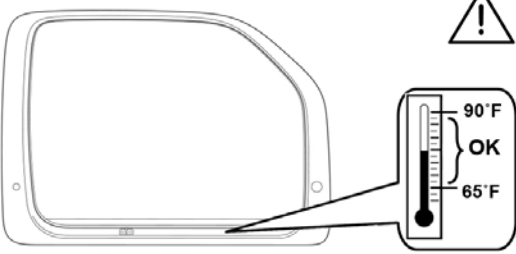

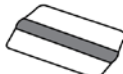

Care must be taken when installing this accessory to ensure damage does not occur to the vehicle. The installation of this accessory should follow approved guidelines to ensure a quality installation.

These guidelines can be found in the "Accessory Installation Practices" document.

This document covers such items as:-

- Vehicle Protection (use of covers and blankets, cleaning chemicals, etc.).
- Safety (eye protection, rechecking torque procedure, etc.).
- Vehicle Disassembly/Reassembly (panel removal, part storage, etc.).
- Electrical Component Disassembly/Reassembly (battery disconnection, connector removal, etc.).

Please see your Toyota dealer for a copy of this document.

WRAP EDGE

13

Reinstall the Door Scuff Plates

TOYOTA TACOMA-C CAB 2016 - DOOR SILL PROTECTORS

Checklist - these points **MUST** be checked to ensure a quality installation.

Check: _____

Look For: _____

Accessory Function Checks

- ☐ Proper adhesion – Visual
- ☐ Proper adhesion – Physical
- ☐ Proper alignment – Cross-Car

Look for bubbles, loose and lifting edges.

With light pressure rub hand over top of part and if crackling sound occurs, resqueegee. If bubbles cannot be worked out to the nearest edge, replace part.

Parts must wrap evenly over the vertical surface.

Vehicle Appearance Check

- ☐ After accessory installation and removal of protective cover(s), perform a visual inspection.

Ensure no damage (including scuffs and scratches) was caused to the door sill or scuff plates during the installation process. (For PPO installations, refer to TMS Accessory Quality Shipping Standard.)
